

Ice in the Summer Time

Most Modern Plant in County Now in Successful Operation.

For the first time in Lehi's history ice was this week frozen into blocks in the good old summer time while the thermometer was standing at between 80 and 90 in the shade. Last Monday the first blocks of ice were taken out of the Garff Bros. ice plant, each block weighing 200 pounds. The blocks are frozen in heavy galvanized iron cans of 11x22x32 inches in size. The big iron vat holds sixty-three of these cans. It requires about forty-eight hours to freeze a cake of ice. When one can is emptied another is filled with pure, fresh city water, thus making the process continuous and giving the plant a capacity of about three tons every twenty-four hours. The machinery is built for a six-ton capacity, which limit can be reached by installing another vat.

The factory consists of a twenty-horsepower electric motor, a condensing tank, a compressor pump, a system of cooling pipes and a big iron vat 3x10x20 feet, filled with salty brine, in which is set cans or moulds filled with fresh city water. Running back and forth through the salty brine and between the cans is a system of pipes filled with anhydrous ammonia. As the ammonia enters the pipes in the vat it passes through a small opening on one side of which the pressure is 150 pounds. The sudden transition from the greater to the lesser pressure changes it from a liquid to a vapor, which action reduces it to a temperature way below freezing point. The cold passes through the pipes to the brine and from the brine into the immersed cans of water.

After it has been reduced again almost to freezing point, the ammonia is subjected to a liquid again by going through the compressor. This process causes great heat and this heat is taken out by passing the liquid ammonia through a system of pipes which themselves are encased in pipes filled with flowing water, the latter as it runs away taking off the heat.

The ice plant is in connection with the Garff Bros. new meat market and refrigeration plant. Their meat box has a capacity of twenty-five hives, besides a lot of hogs and sheep. It is divided into two compartments, one 6x8x14 feet where the meat is taken out of the meat, and the other 12x8x14 feet, where it is kept in storage ready for use. The meat is hung on an overhead track and will be kept at a temperature of about 32 degrees. The big box is kept at a low temperature by a system of pipes, through which the ice cold brine is pumped after being cooled in the big vat. They also have a showcase in which cuts will be kept and through which the refrigeration pipes will be passed, so that the meat at all times will be kept at a low temperature and in a sanitary condition.

The plant and the ice box cost between \$4,000 and \$5,000 and weighed over 25,000 pounds. There was over six tons of rock wool insulation material alone with which the ice vat and refrigeration boxes are lined.

The only expense of operating the plant is for electric power, as the ammonia and brine are used over and over again.

The plant was made by the Artie Ice Machine company of Canton, Ohio. It was installed by H. H. Keener of Salt Lake City, who says that it is the best equipped plant in Utah county and one of the best in the state.

The Garff Bros. have put a cement floor in their shop and will probably be open for business in their new quarters the first of the week. They now are making ice for the trade at the rate of three tons per day.

Boy Scouts Camped at Saratoga Springs

Summer Course in Manual Training

The local school board has authorized the teaching of a course in manual training at the high school shop for boys of the seventh and eighth grades. Mr. Banks will have charge of the work. Boys will be instructed in the proper care and use of tools. Exercises will be given in sawing and planing, after which the boys will be allowed to make simple articles of their own selection.

Classes will meet from 4 to 6 p. m. on Tuesdays and Thursdays of each week. This, however, is only a tentative schedule, as the days and hours will be modified to suit the convenience of those who enroll.

No charge will be made for the course, but the boys will be expected to pay for the material used in the articles they keep.

Application for the course should be made to Mr. Banks at once, as the first class will meet Tuesday afternoon, June 23, at the high school shop.

The Proof Is Here the Same as Everywhere.

For those who seek relief from kidney backache, weak kidneys, bladder, Doan's Kidney Pills offer hope of relief and the proof is here in Utah county the same as everywhere. Utah county people have used Doan's and Utah county people recommend Doan's the kidney remedy used in America for fifty years. Why suffer? Why run the risk of dangerous kidney illness—fatal Bright's disease. Here's American Fork proof. Investigate it.

Mrs. W. S. Greenwood, American Fork, Utah, says: "I have taken Doan's Kidney Pills, and they have never yet failed to give the best of results. Generally, the trouble I had could be traced to over exertion which tended to weaken my kidneys. This caused attacks of backache and a general weakness. Doan's Kidney Pills are certainly good for ailments of that kind. I can bear witness that they relieve pains across the back and cause the kidneys to act regularly."

Price 50 cents at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Greenwood had. Foster-Milburn Co., Props., Buffalo, N. Y.

BURLINSON AND GOVERNMENT OWNERSHIP.

It is estimated that the existing lines could be purchased for about \$500,000,000. By the issuance of national bonds the matter of acquiring these lines would not be such a difficult proposition as some others that would be inevitably connected with such an enormous transfer. All of which would be discounted if it were certain that economic good and equal or better service would be the public's portion. But of this there is indeed no reliable assurance.

Out Mr. Burlinson would do well to devote his time and energies to the administration of the postoffice department, instead of championing an ill-considered socialistic experiment for which there is little general public demand. After all is said and done it remains a fact that we have the best service in the world, and it is growing better under the present competition. And, as for Mr. Burlinson's department, there is probably no department more sorely in need of practical attention.—Uniontown Daily News-Standard.
